<b>Opinion: Paper war over Basel</b>	It is not clear whether the new Basel Accord, when finalised, really will be worth all this time, effort and money.	<b>1</b>
<b>The end of central banking?</b>	<i>Central Banking</i> responds to Stephen Grenville's challenging views on the future (see page 38).	<b>4</b>
<b>Bank notes</b>	A round-up of the salient events and issues that have affected central bankers over the past three months.	<b>6</b>
<b>The IMF answers its critics</b>	Tom Dawson, Director of the IMF's External Relations Department, on the myriad problems hounding the IMF and how the new managing director is tackling them.	<b>12</b>
<b>The Fed and the White House</b>	In the past, relations between Alan Greenspan and the White House have been little short of perfect. But John Berry detects divergent views on one issue – financial assistance to emerging markets.	<b>20</b>
<b>Martin Mayer on The Fed</b>	Think you know everything you need to know about the Fed? Read Martin Mayer's latest book, and you might be pleasantly surprised.	<b>24</b>
<b>On China's central bank</b>	Bruce Gilley and David Murphy assert that the People's Bank of China operates under the guidance of the Central Financial Work Committee. They say China urgently needs to reform its financial system if it wants to be a serious player in the game of international finance.	<b>29</b>
<b>Round up the usual suspects</b>	Madeleine Wackernagel assesses the risks of the financial crisis in Argentina spreading to the usual suspects among vulnerable emerging markets - and perhaps even further. Should we worry about the domino effect or is it little more than a scare?	<b>34</b>
<b>The end of history?</b>	Now that inflation has been curbed in most parts of the world, central bankers might well be asked to raise their sights. Stephen Grenville of the Reserve Bank of Australia ponders what those new challenges might be.	<b>38</b>

## **Central Banking** **Volume XII No. 1**

---

<b>Central bank websites</b>	Timo Laurmaa from the BIS considers the issues involved with internet publishing for central banks, and offers his views concerning the correct path to follow.	<b>43</b>
<b>How to succeed as a central banker</b>	Benedict Mander discovers what it takes to succeed in central banking and reveals some intriguing trends – and exceptions – in the lives of those who made it.	<b>47</b>
<b>In praise of Robert Mundell</b>	James W. Dean explains why Robert Mundell is revered in economic circles, and elucidates the effects of his thought on economic policy.	<b>51</b>
<b>David Kynaston on the City</b>	William Clarke admires the fourth volume of David Kynaston’s monumental history of the City, treating the postwar era.	<b>59</b>
<b>Argentina’s pseudo crisis</b>	Argentina’s currency board system is playing up. Steve Hanke explains why, and what solution should be adopted.	<b>64</b>
<b>How the Bank of Canada gained credibility</b>	The experience of the Bank of Canada suggests that legal independence and a specific mandate of price stability may not be necessary to gain policy credibility.	<b>68</b>
<b>The case for global standards</b>	George J. Vojta presents the case for the adoption of best practice standards in “key policy areas” by countries participating in the global financial system with a view to preventing or at least minimising crises.	<b>79</b>
<b>Central bank risk management</b>	Paul Higginson and Terry Beadle analyse the considerations and constraints when choosing and installing a risk management system for central banks.	<b>91</b>
<b>Interview: Bodil Andersen</b>	The governor of Denmark’s central bank, Bodil Andersen, on exchange rate policy, the euro and the ECB.	<b>96</b>
